

Tosska SQL Tuning Expert Pro for Oracle® 5.0.0 - Release Notes

Release Notes

July 2026

About Tosska SQL Tuning Expert Pro for Oracle®

Tosska SQL Tuning Expert Pro (TSE Pro™) for Oracle® is an automatic SQL tuning product that uses AI technology to tune your SQL statements by proprietary SQL Rewrite, Oracle Hints Injection and exploring indexes technologies to improve your SQL statements' performance WITH or WITHOUT touching your source code. An intelligent cost-aware Indexes Advisor is also provided to recommend cost-effective indexes for a given SQL workload.

Supported Oracle® versions

Oracle® 11.2 or higher

Known Issues

1. Migration of SQL Patches or Plan Baselines from 12C or higher to 11G is not allowed.

SQL Tuning Expert Pro for Oracle 5.0.0

SQL Tuning Expert Pro 5.0.0 is a major release which includes new features, enhancements and bug fixes.

SQL Tuning

- Greatly improves SQL rewrite capabilities by controlling table join order through rewriting the WHERE clause and ON conditions.
- Adds optimization support for additional SQL syntax.

Connection

- Adds support for Kerberos authentication.

Resolved Issues in 5.0.0

Feature	Resolved Issue	Issue ID
Tune SQL	Fixed a row count mismatch error when rewriting SQL.	TSEP-628
License Manager	Fixed the max connections for unlimited connection in License Manager window	TESP-622
